

## The 11 x 20 + 14

This refers to the 234 inhabitants of Mons-en-Montois who perished in the church during the Anglo-Burgundian attack of in April 1430.

## The old lime kiln

There were many lime quarries around the town, and the material was used as plaster for the facades and interior walls of the houses. Engraved dates reveal that the site was in operation in the early 19th century.

## The Fountain

This fountain was built to collect water flowing from a pipe. The water was collected to water the farm animals.

## The Mons-en-Montois wash house

The wash-house is supplied by the Mons stream, which has its source at the Saint-Fiacre spring. The spring was renowned for healing "lower diseases" of the lower abdomen and became the destination of numerous pilgrimages.
